SUMMARY

Experienced Data Analyst with over 5 years delivering insights, data visualisations, and business intelligence solutions across telecommunications, retail, e-commerce, and hospitality domains. Skilled in the full data lifecycle — from requirements gathering, data querying and transformations through data modelling and compelling storytelling — with a track record of enabling data-driven decision making in cross-functional teams. Proven ability to mentor colleagues and champion analytics best practices across organisations.

SKILLS & TOOLS

- Technical Skills: Data Analysis, Storytelling, Data Modelling, Data Transformations, Data Quality Monitoring
- Tools: SQL, dbt, Git, Power BI, Power Query, M, DAX, Looker, Amazon Quicksight, Tableau, BigQuery, Snowflake, Databricks, Python, Power Automate, Excel, Power Point, Sharepoint
- Soft Skills: Stakeholder Management, Requirements Gathering, Cross-Functional Collaboration, Mentoring

WORK EXPERIENCE

Senior Data Analyst

Aug 2024 - May 2026

Rogers Communications, Vancouver, Canada

- Designed, developed, and maintained Power BI dataflows and dashboards, including a key dashboard tracking project status and materials needs to highlight priorities and risks.
- Built and optimized data pipelines using Power BI dataflows and Power Automate to trigger automatic sequential refresh, improving data reliability across the workspace.
- Refactored data models and refresh schedules to reduce capacity compute consumption and pipeline failures.
- Developed a data quality monitoring process to track data sources freshness and maintain data integrity, triggering automatic alerts and blocking downstream refreshes when upstream dependencies failed.
- Documented data sources and pipelines to support collaboration and assess impacts of upstream/downstream changes.
- Translated business requirements into actionable dashboards and reports through close collaboration with cross-functional stakeholders.
- Automated repetitive data processes using Power Automate, increasing efficiency and reducing manual effort.
- Supported ERP migration to the cloud by validating new data sources and planning report transitions, minimising business disruption.
- Mentored and coached team members on data analysis, data modelling, and Power BI best practices to ensure consistency and data integrity across the workspace.
- Partnered with Supply Chain stakeholders to provide insights on material requirements, process changes, and project prioritization.

Data Analyst

Sep 2022 - Aug 2024

Rogers Communications, Vancouver, Canada

- Delivered accurate and timely reporting on materials needs, consumption, flow, and utilisation across projects, supporting data-driven decision making for Project Management and Supply Chain teams.
- Served as Subject Matter Expert for one of the most-viewed Power BI reports in the workspace, averaging 200+ active users per 30-day period, providing self-serve visibility into materials requests and fulfillment.
- Developed logic and a Power BI report to estimate expected fulfilment dates for open orders by integrating current stock, incoming purchase orders, and pending requisitions — enabling proactive Supply Chain decisions.
- Extracted and loaded data from multiple data sources (flat files and SQL Server) applying transformations using Power Query (M).

Junior Data Analyst

Sep 2021 - Jun 2022

Petz, Sao Paulo, Brazil

- Developed a self-serve analytics dashboard in Amazon QuickSight to communicate results of the company's most important e-commerce commercial tool — personalised offers — delivering data visualisation and actionable insights to both technical and non-technical stakeholders.
- Improved the monthly reporting process using Excel and PowerPoint, reducing report-generation effort from 7 hours to approximately 3 hours per month (57% time reduction) and decreasing the risk of manual errors through automation of data and chart updates.
- Automated data pipeline tasks using Python and SQL on Databricks to update tables, producing reliable and consistent data for downstream analysis and reporting.
- Built modular data structures and models in data marts using dbt, applying data modelling best practices to support reporting workflows and easy data consumption.

Business Intelligence Analyst

Dec 2017 - Mar 2019

Atlantica Hotels, Barueri, Brazil

- Led the implementation of the company's on-premises Data Warehouse, evaluating requirements from multiple internal stakeholders with a primary focus on the Sales & Marketing department — reducing the time to generate insights and freeing analysts from days of manual reports preparation.
- Delivered ad hoc analytics dashboards and reports using Power BI and DAX, enabling senior management to make timely, data-driven decisions.
- Trained and empowered end-users to conduct self-serve analysis on the Data Warehouse and build their own Power BI reports, directly supporting data literacy and reducing dependency on the BI team.
- Identified sales opportunities through high-level competitive analysis of hotel performance reports, enabling the sales team to take more targeted actions in negotiations.
- Contributed to location and sales opportunity analysis for new hotel openings, supporting improved pre-opening bookings performance.

EDUCATION**Bachelor's Degree in Hotel Management**

Feb 2011 - Dec 2014

Centro Universitario Senac, Sao Paulo, Brazil

Bachelor's Degree in Veterinary Medicine
Universidade de Sao Paulo, Sao Paulo, Brazil

Mar 2005 - Dec 2009
